THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. **PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE** OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: **Mail** **Mail Stop ISSUE FEE**
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450
or Fax **(571)-273-2885**

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

DATE MAILED: 04/20/2009

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 497 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 497 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

DETAILED ACTION

1. This Office action is in response to the amendment filed on August 18, 2008.
2. **Claims 1, 5-10, 14-23, 25, and 28-32** are pending.
3. **Claims 1, 10, 19, and 25** have been amended.
4. **Claims 2-4, 11-13, 24, 26, and 27** have been canceled.
5. **Claims 1, 5-10, 14-23, 25, and 28-32** are allowed, renumbered as 1-23.
6. The 35 U.S.C. § 112, second paragraph, rejections of Claims 3 and 27 are withdrawn in view of Applicant's cancellation of the claims.

Examiner's Amendment

7. An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this Examiner's amendment was given in a telephone interview with William E. Hunter (Reg. No. 47,671) on April 10, 2009.

The application has been amended as follows:

AMENDMENTS TO THE CLAIMS

Please cancel Claims 2, 12, and 26 and amend Claims 1, 10, 19, and 25 as follows:

1. (Currently Amended) A machine-implemented method comprising:

obtaining an install comparison of a current software installation to a target computer and an install comparison of a previous software installation to the same target computer in a series of two or more software installations during a software product development;

generating a software trend comparison of a current software installation, to a target computer, with a previous software installation, to the same target computer, in a series of two or more software installations during a software product development of the current software installation install comparison with the previous software installation install comparison;

obtaining creating expected installation data results for a resource, based at least in part on the comparison, the resource including attributes including a dynamic attribute and a static attribute, the dynamic attribute is an attribute that should have changed between the previous software installation and the current software installation, the static attribute is an attribute that should remain unchanged between the previous software installation and the current software installation;

comparing identifying from the expected installation data results with the software trend comparison to identify whether the dynamic attribute that was not changed in the current software installation and whether the static attribute was changed in the current software installation; and

presenting potential problems with the current software installation, based on results of the identified dynamic attribute comparing the expected installation results with the software trend comparison, to facilitate verification of an installer for the software product development.

2. (Canceled)

10. (Currently Amended) A software product tangibly embodied in a machine-readable storage device, the software product comprising instructions operable to cause one or more data processing apparatus to perform operations comprising:

obtaining an install comparison of a current software installation to a target computer and an install comparison of a previous software installation to the same target computer in a series of two or more software installations during a software product development;

generating a ~~software trend~~ comparison ~~of a current software installation, to a target computer, with a previous software installation, to the same target computer, in a series of two or more software installations during a software product development of the current software~~ installation install comparison with the previous software installation install comparison;

obtaining ~~creating expected~~ installation data results for a resource, based at least in part on the comparison, the resource including attributes including a dynamic attribute and a static attribute, the dynamic attribute is an attribute that should have changed between the previous software installation and the current software installation, the static attribute is an attribute that should remain unchanged between the previous software installation and the current software installation;

comparing ~~identifying from the expected~~ installation data results with the software trend comparison to identify whether the dynamic attribute ~~that~~ was not changed in the current software installation and whether the static attribute was changed in the current software installation; and

presenting potential problems with the current software installation, based on results of the identified dynamic attribute comparing the expected installation results with the software trend comparison, to facilitate verification of an installer for the software product development.

12. (Canceled)

19. (Currently Amended) A system comprising:

a build controller;

an install controller comprising a database including a baseline recording expectations of a dynamic attribute and a static attribute for one or more resources associated with a software installer, the dynamic attribute is an attribute that should have changed between a previous software installation and a current software installation, the static attribute is an attribute that should remain unchanged between the previous software installation and the current software installation; and

one or more install slave machines;

wherein the build controller automatically triggers the install controller to initiate installer tests as part of a software build process, and the install controller automatically dispatches installation to the one or more install slave machines and collects test results to be presented in a report comprising a baseline-update interface;

wherein the test results comprise a potential problem with the current software installation identified based on a comparison of the expectations with a software trend comparison that compares an install comparison of the current software installation with an

install comparison of the previous software installation in a series of two or more software installations during a software product development to identify whether the dynamic attribute was not changed in the current software installation and whether the static attribute was changed in the current software installation.

25. (Currently Amended) A system comprising:

a user interface device; and

one or more computers operable to interact with the user interface device and to perform operations comprising:

obtaining an install comparison of a current software installation to a target computer and an install comparison of a previous software installation to the same target computer in a series of two or more software installations during a software product development;

generating a software trend comparison of a current software installation, to a target computer, with a previous software installation, to the same target computer, in a series of two or more software installations during a software product development of the current software installation install comparison with the previous software installation install comparison;

obtaining creating expected installation data results for a resource, based at least in part on the comparison, the resource including attributes including a dynamic attribute and a static attribute, the dynamic attribute is an attribute that should have changed between the previous software installation and the current software installation, the static attribute is an attribute that should remain unchanged between the previous software installation and the current software installation;

comparing identifying from the expected installation data results with the software trend comparison to identify whether the dynamic attribute that was not changed in the current software installation and whether the static attribute was changed in the current software installation; and

presenting potential problems with the current software installation, based on results of the identified dynamic attribute comparing the expected installation results with the software trend comparison, to facilitate verification of an installer for the software product development.

26. (Canceled)

-- END OF AMENDMENT --

Reasons for Allowance

8. The following is an Examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fail to teach, in combination with the other claimed limitations, "generating a software trend comparison of the current software installation install comparison with the previous software installation install comparison; obtaining expected installation results for a resource including attributes including a dynamic attribute and a static attribute, the dynamic attribute is an attribute that should have changed between the previous software installation and the current software installation, the static attribute is an attribute that should remain unchanged between the previous software installation and the current software installation; comparing the expected installation results with the

software trend comparison to identify whether the dynamic attribute was not changed in the current software installation and whether the static attribute was changed in the current software installation” as recited in independent Claims 1, 10, and 25; and further fail to teach, in combination with the other claimed limitations, “an install controller comprising a database including a baseline recording expectations of a dynamic attribute and a static attribute for one or more resources associated with a software installer, the dynamic attribute is an attribute that should have changed between a previous software installation and a current software installation, the static attribute is an attribute that should remain unchanged between the previous software installation and the current software installation” and “wherein the test results comprise a potential problem with the current software installation identified based on a comparison of the expectations with a software trend comparison that compares an install comparison of the current software installation with an install comparison of the previous software installation in a series of two or more software installations during a software product development to identify whether the dynamic attribute was not changed in the current software installation and whether the static attribute was changed in the current software installation” as recited in independent Claim 19.

The closest cited prior art, the combination of US 6,738,970 (hereinafter “Kruger”) and US 6,560,776 (hereinafter “Breggin”), teaches a method and an apparatus that identifies changes made to a computer system caused by the installation of software. However, the combination of Kruger and Breggin fails to teach “generating a software trend comparison of the current software installation install comparison with the previous software installation install comparison; obtaining expected installation results for a resource including attributes including a dynamic attribute and a static attribute, the dynamic attribute is an attribute that should have

changed between the previous software installation and the current software installation, the static attribute is an attribute that should remain unchanged between the previous software installation and the current software installation; comparing the expected installation results with the software trend comparison to identify whether the dynamic attribute was not changed in the current software installation and whether the static attribute was changed in the current software installation” as recited in independent Claims 1, 10, and 25; and further fails to teach “an install controller comprising a database including a baseline recording expectations of a dynamic attribute and a static attribute for one or more resources associated with a software installer, the dynamic attribute is an attribute that should have changed between a previous software installation and a current software installation, the static attribute is an attribute that should remain unchanged between the previous software installation and the current software installation” and “wherein the test results comprise a potential problem with the current software installation identified based on a comparison of the expectations with a software trend comparison that compares an install comparison of the current software installation with an install comparison of the previous software installation in a series of two or more software installations during a software product development to identify whether the dynamic attribute was not changed in the current software installation and whether the static attribute was changed in the current software installation” as recited in independent Claim 19.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.
